All-In-One Home Audio System

Unlike its portable counterparts in the Yoyo range, (L) is designed to stay firmly in the hub of home life, delivering exceptional power and sound quality for all of your audio needs.

Yoyo (L) includes Bluetooth streaming, Chromecast built-in, Spotify Connect and not forgetting an ARC and Optical Input to hook your TV up to it too.

(L) houses three speakers in one to deliver a powerful centre stage plus left and right channel separation for an incredibly immersive experience.

Demonstration Tracks

At Cambridge Audio we use our ears constantly, both as passionate music lovers and audio professionals looking for test examples.

We test our products with all types of content and the following suggestions are our picks for a great demo experience for your customers.

1

DROP by CORNELIUS POINT (2001)

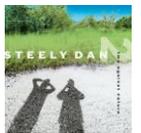

Drop by Cornelius from 2001 album Point is a fun listen that kicks off with splashing stereo water before overlaying a rhythmic acoustic arrangement dusted with light vocals. Yoyo (L)'s three speaker configuration easily handles the multi layered soundstage.

POINT by CORNELIUS

2

JACK OF SPEED by STEELY DAN TWO AGAINST NATURE (2000)

The Yoyo (L)'s rigid sealed construction gives Jack of Speed's laidback groove and melodic bassline plenty of room to breath and with plenty of power to spare. Select the Music EQ, set the sub to the middle position and enjoy.

Great British Sound

What does 'British Sound' mean? To us it's about removing any barriers that might distort or alter the original recording and not adding any of our own flavour. What you hear from our products is a pure and unfiltered 'British' sound – just as the artist intended.

Room Filling Sound

Our in-house engineering team have gone to great lengths to ensure an exceptionally detailed and yet expansive sound from the Yoyo (L), faithful to our philosophy of delivering Great British Sound.

FRONT AND SIDEMOUNTED DRIVERS

Yoyo (L) delivers a powerful centre stage plus individual left and right channel separation. A driver and a subwoofer work in tandem on the front and each side of the Yoyo (L) delivering an incredibly immersive experience.

FOUR EQ SETTINGS

Select from four EQ settings to optimise your audio perfectly for your content. Simply choose your mode from the supplied remote control and dial the bass up or down to your liking – Music, TV, Film or Voice.

MARTON MILLS ACOUSTICALLY TRANSPARENT FABRIC COVERING

We wanted Yoyo to deliver British Sound in British Style so we partnered with world-renowned Yorkshire weavers Marton Mills who have been expertly crafting fabrics since 1931 to wrap each of our speakers in 100% worsted wool. Our bespoke Birds Eye fabric is treated to repel dirt, water and unnecessary wear and tear. It also undergoes extensive testing to ensure acoustic transparency meaning the sound is anything but woolly.

Versatile Connectivity

Designed as a living room audio hub, Yoyo (L) connects to a wide variety of media including a selection of hard wired connections as well as network and Bluetooth options.

CHROMECAST BUILT-IN

Chromecast allows users to send audio from their favourite apps directly to the Yoyo (L) from the app's servers meaning the phone or tablet becomes a control device rather than the source. Chromecast works seamlessly with Android devices and many popular iOS applications. Just tap the Chromecast icon within the app, select Yoyo (L) and start casting content from Spotify, Tidal, TuneIn, Deezer and many more. Chromecast also supports multi-room audio meaning the Yoyo (L) will work in a group alongside other Chromecast enabled speakers.

A full list of compatible apps is available on the google store website.

HDMI ARC

A conventional TV HDMI port only allows information to travel one way – in to the TV. Connecting an Audio Return Channel (ARC) capable sound system to the TV ARC port allows an audio signal to travel back the other way. Connecting Yoyo (L) using ARC means there is no need for an additional optical cable to enjoy enhanced television audio performance.

BLUETOOTH

When other connection methods aren't available, Yoyo (L) has Bluetooth built-in for ultimate convenience.

Clever Touches

Yoyo (L) has some really neat features built in to help you get the most from your new speaker.

IR REMOTE LEARNING

If you connect to your TV using ARC then your TV remote will automatically change Yoyo (L)'s volume. If not you may want to programme Yoyo (L) to learn your TV remote's volume commands.

1. To learn the Vol+ command from your TV remote, press and hold the input select and + buttons on Yoyo (L) for 3 seconds. The + button on the Yoyo (L) will start flashing. Press the Vol+ button on your TV remote, remembering to point it at Yoyo (L).
2. To learn the Vol- command from your TV remote, press and hold the input select and - buttons on Yoyo (L) for 3 seconds. The - button on the Yoyo (L) will start flashing. Press the Vol- button on your TV remote, remembering to point it at Yoyo (L).
3. To learn the Mute command from your TV remote, press and hold the input select and both Volume + / - buttons on Yoyo L for 3 seconds. Both Volume + / - on the Yoyo L will start flashing. Press the Mute button on your TV remote, remembering to point it at Yoyo L.

USB CHARGING

Tired of your smartphone running out of power whilst playing music? Yoyo (L)'s built in USB port lets you charge your smartphone or other MP3 device whilst you listen.

NFC

Simply tap your NFC (Near Field Communication) enabled Android device to the NFC logo on Yoyo (L) to set up a Bluetooth connection.

Inside Story

SIMON FREETH
SENIOR MECHANICAL
DESIGN ENGINEER

We're located in London SE1, right on the doorstep of some of the most creative, exciting developments in the music industry and our products are designed and engineered in-house. Outside of work we're musicians, sound engineers and above all music lovers.

The Yoyo family of speakers cover almost every usage scenario we could think of. With the (S) and (M) being portable products, the Yoyo (L) was the final piece of the puzzle. It's connectivity and form factor make it the perfect small living room all-rounder.

Simon says "The biggest challenge we faced whilst designing the Yoyo (L) was fitting it all into such a small box. Inside it's like a submarine - lots of bulkheads to keep it rigid and airtight to get the subwoofer performance right. We even had to build an 'airlock' for the concealed inputs to stop air leaking out.

In addition, finding the right fabric to finish the Yoyo range took time as it had to be hardwearing, look smart and most importantly have no negative impact on the sound. In the end, Marton Mills came up with a bespoke version of one of their patterns that fit the bill."

CONNECTIVITY	Bluetooth with NFC Spotify Connect Google Chromecast HDMI ARC 3.5mm AUX S/PDIF Optical
DIMENSIONS	269mm x 125mm x 269mm

Related Products

YOYO (S)

(S) stands for small and from the outside, that is exactly what this speaker is. Highly compact and perfectly portable. But behind the fabric, (S) boasts a range of components selected for the most powerful and high quality performance you can fit into a speaker this size. So the sound is anything but small.

YOYO (M)

There's no disguising that (M) was made by Hi-Fi engineers. Yes, a one box speaker is practical and space efficient, but from a sound perspective this is a compromise. Recorded music is mastered to be heard in stereo, and for that you need two speakers. Which is why we've introducing L+R channel into the world of portable Bluetooth speakers.
